

The City is starting curbside trash service in July. Here are things you need to know!

1

Doty Trash Services has been awarded the contract by the Aurora City Council. The monthly fee is \$14.47

2

Curbside trash service begins July 3, 2023 for residential customers within the city of Aurora. All residents need to notify their current trash service provider that the last month of service will be June.

3

All single family residence customers are required by City Code to have trash service provided by the City of Aurora. No other trash service provider is authorized and burning of trash will be prohibited.

4

The city trash service mostly covers single family residences. Some landlords of multi-family units may want the city to take over that service. If you live in an apartment, check with your landlord about trash service changes.

5

The first bill for trash service will appear on the monthly sewer bill that will go out July 18. The bill will be due August 7th.

6

If a residence needs/wants a second trash cart, the added fee above the standard service rate will be \$12.

More information will be coming. Check the city website for details
